ETHNOLOGY BUILDING, PAN-AMERICAN EXPOSITION.

Copyright, 1900, by the Pan-American Exposition Co One of the handsome structures at the great Pan-American Exposition. which is to be held in Buffalo from May 1 to Nov. 1, 1901, will be the Ethnology building. It will contain an exhibit of unusual interest to all Americans. Ethnology is the science which treats of the division of mankind into races, their origin, distribution and relations and the peculiarities which characterize them. At Buffalo the Ethnology building will be a veritable mine of information concerning the countries of North and South America. This will be peculiarly appropriate for the reason that the Exposition is a Pan-American, or All-American, event, and everything of interest concerning the various nations inhabiting the new world discovered by Columbus will be represented by an interesting exhibit in Buffalo when the Exposition's gates open on May 1. 1901. Strange to relate, the most interesting exhibits concerning several countries in South America are already in this country. Peru, for example, will send many interesting exhibits to the Pan-American Exposition and will use her influence to have exhibited in her section the remarkable collection of Peruvian antiquities now owned by various American museums.
